

● PROFILE

Hi!

As Industrial & Spatial Designer, I have focused my attention on conceptualizing, developing and producing design projects matching as closely as possible the various personal interests and specific goals of my clients.

After gaining extensive experience in Colombia, where I am from, I decided to pursue my career in Europe in order to increase my knowledge through new original experiences and design patterns, bringing European companies an oversea perspective on designs.

The United Kingdom & London especially have offered me the opportunity to broaden my potential as a designer, working and growing alongside people with eclectic backgrounds & experience in fields like exhibition design, fashion retail and interiorism.
